

How do I give my project the best chance to run on time, on budget and successfully deliver quality outcomes?

Answer:

Become qualified in Project Management

What is Project Management?

Project Management is the discipline of organising and managing resources to successfully complete a project. Project Management can also be described as a way of successfully managing change.

By definition, a project has a clear beginning and end, and stands outside 'business as usual' functions. This distinction has necessitated the development of specialist project management skills.

Project Management is an established industry discipline, and skilled practitioners are in strong demand from organisations across all sectors. Talented and professionally trained Project Managers bring real value to organisations.

Their skills in effectively managing components such as time, budgets and teams of people, provide organisations with a strong and sustainable future. Effective project management allows projects to be completed efficiently, enhances customer satisfaction, improves quality, supports continuing growth and provides organisations with a more competitive edge. It's no wonder professional practitioners are in high demand and enjoy abundant career opportunities.

Interlink Technology Services understands that the roles and responsibilities of Project Managers vary considerably, and is pleased to offer three distinct Project Management programs. Each program has been developed in consultation with industry leaders.

The programs are based on the Project Management Body of Knowledge®, the Australian National Competency Standards for Project Management, the Global Alliance for Project Performance Standards.

Candidates receive comprehensive development in the management of time, cost, quality, scope, human resources, risk, communications, integrative processes and procurement with each component varying in detail and level according to the program selected.

Our specialist qualifications provide practitioners with the essential skills to successfully navigate the world of Project Management.

CLIENTS	<p>Candidates will include Project Managers, Senior Project Managers and Program Managers wishing to understand, and demonstrate competence in the duties of a Program Manager who apply specialised knowledge and skills, together with experience in program management across a range of enterprise and industry contexts. A program is defined as a set of interrelated projects, each of which has a project manager. 'Multiple projects', or 'a program of projects', refers to several related projects managed by the same person as a program to achieve organisational objective/s.</p>		
DELIVERY AND ASSESSMENT ARRANGEMENTS	DURATION		
	The program is delivered over a period determined for each candidate. Determined by pathway, it is anticipated that most candidates will take between 12 and 18 months to complete the requirements of the qualification.		
DELIVERY AND ASSESSMENT ARRANGEMENTS	ORGANISATION		
	<p>The required Units of Competency are underpinned by the 12 knowledge areas and the 5 project management processes that constitute the Project Management Lifecycle. These requirements are outlined in the Project Management Body of Knowledge® (PMBOK), which, along with the National Competency Standards for Project Management training package and ISO 21500:2012, provide the primary references for this program. The program is organised to provide candidates with the necessary knowledge, skills and performance requirements for employment as a program manager. Twelve units of competence are required to complete the qualification requirements. The alignment between the Units of Competency and the assessment program appears on the next page.</p>		

Graduate Testimonials

I would like to thank the trainer for his down to earth manner and easy approach. The class that I attended was a mixture of people from all trades and professions, and to the trainers great credit, he guided all of us successfully through the course, readily connecting with managerial staff and guys at the coal face like me, and then coming on site with us. I have no hesitation in recommending Interlink Technology to anyone considering this course. I believe your company has a lot to offer all companies big and small and will contribute to a more professional working Australia.

– Peter
(*Waterproofing Membrane Industry*)

This project management course built upon my existing knowledge and practices, and has given me the additional skills to deliver a more defined and better managed project. The course was both challenging and fast paced, and used a lot of practical examples to make it more understandable and enjoyable. I highly recommend this course.

– Rob (*Aerospace Industry*)

I have been involved in project management for many years now and in the last three years have personally managed well over \$70,000,000 worth of projects. This course was not only informative, but provided a practical insight into the tools required to enhance our current business. I have already implemented a number of the procedures delivered during the course, and will continue to phase in lessons learned. Course content was delivered in a practical and succinct manner, and never failed to hold my interest.

– Steve (*Construction Industry*)

I have benefited no end from attending this course. I have been a project manager for just two years, but since completing six weeks of course work, I already feel like a more competent and confident project manager. With the skills I have learned, my current project is now forecasting a higher profit percentage, and I am spending less time at work.

– Ian (*Electrical/Mechanical Engineering Industry*)

Interlink Technology are a dynamic group of training and consultancy companies, who specialise in the provision of practical professional development programs, which are tailored to the needs of individual workplaces.

Our facilitators have significant commercial experience and are in tune with the constantly changing demands of today's sophisticated business environment.

Our facilitators are well respected advocates of the risk profession, and dedicated to the provision of quality support to our clients. Inspiring case studies, practical exercises and applied learning techniques are used throughout the course. Learning and retention is enhanced through the provision of highly visual training methods and a continuous review process.
